Companies: Tax saving opportunities

Companies: Tax saving opportunities

Pre-year end tax planning is important as the current year's results can normally be predicted with some accuracy and time still exists to carry out any appropriate action. Therefore, it is advisable to carry out an annual review of your companies tax position. Here we look at some of the areas for tax planning.

If you would like to discuss how we can assist you, please contact us on 01494 675321 or by email at info@rousepartners.co.uk

Corporation tax

Advancing expenditure

Expenditure incurred before the company's accounts year end may reduce the current year's tax liability.

In situations where expenditure is planned for early in the next accounting year the decision to bring forward this expenditure by just a few weeks can advance the related tax relief by a full 12 months.

Examples of the type of expenditure to consider bringing forward include:

- building repairs and redecorating
- advertising and marketing campaigns
- redundancy and closure costs.

Note that payments into company pension schemes are only allowable for tax purposes when the payments are actually made as opposed to when they are charged in the company's accounts.

Capital allowances

Consideration should also be given to the timing of capital expenditure on which capital allowances are available to obtain the optimum reliefs.

Single companies irrespective of size are able to claim an Annual Investment Allowance (AIA) which provides 100% relief on expenditure on plant and machinery (excluding cars). The amount of AIA is currently set at £200,000.

Groups of companies have to share the allowance. Expenditure on qualifying plant and machinery in excess of the AIA is eligible for writing down allowance (WDA) of 18%. Where the capital expenditure is incurred on integral features the WDA is 8%.

100% allowances on designated energy saving technologies continue to be available in addition to the AIA. Details can be found at www.gov.uk/guidance/energytechnology-list

Limited allowances are also available for investments in certain types of building.

Trading losses

Companies incurring trading losses have three main options to consider in utilising these losses:

- they can be set against any other income (for example bank interest) or capital gains arising in the current year
- they can be carried forward and set against trading profits arising in future years
- they can be carried back for up to one year and set against total profits.

More flexibility for losses from April 2017

The government have amended the rules for corporation tax losses to make the tax relief more flexible. When losses arising on or after 1 April 2017 are carried forward, they will be available to be used against profits from different types of income in the company and other group companies.

There will, however, be a restriction on the use of carry forward losses where a company's or group's profits are above £5 million. Any profits over £5 million arising on or after 1 April 2017 cannot be reduced by more than 50% by brought forward losses. Losses that have arisen at any time will be subject to these restrictions.

Extracting profits

Directors/shareholders of family companies may wish to consider extracting profits in the form of dividends rather than as increased salaries or bonus payments.

This can lead to substantial savings in national insurance contributions (NICs).

Note however that company profits extracted as a dividend remain chargeable to corporation tax at a minimum of 19% (reducing to 17% from 1 April 2020).

Dividends

From the company's point of view timing of payment is not critical, but from the individual shareholder's perspective, timing can be an important issue. A dividend payments in excess of the Dividend Allowance which is delayed until after the tax year ending on 5 April may give the shareholder an extra year to pay any further tax due. The Dividend Allowance is £2,000 for 2018/19 (£5,000 for 2017/18)

The deferral of tax liabilities on the shareholder will be dependent on a number of factors. Please contact us for detailed advice.

Loans to directors and shareholders

If a 'close' company (broadly, one controlled by its directors or by five or fewer shareholders) makes a loan to a shareholder, this can give rise to a tax liability for the company.

If the loan is not settled within nine months of the end of the accounting period, the company is required to make a payment equal to 32.5% (25% for loans made before 6 April 2016) of the loan to HMRC. The money is not repaid to the company until nine months after the end of the accounting period in which the loan is repaid by the shareholder.

A loan to a director may also give rise to a tax liability for the director on the benefit of a loan provided at less than the market rate of interest.

Rates of tax

The main rate of corporation tax is currently 19%. The rate for future years is:

- 19% for the Financial Years beginning on 1 April 2018 and 2019
- 17% for the Financial Year beginning on 1 April 2020.

Self assessment

Under the self assessment regime most companies must pay their tax liabilities nine months and one day after the year end.

Companies which pay (or expect to pay) tax at the main rate are required to pay tax under the quarterly accounting system. If you require any further information on the quarterly accounting system, we have a factsheet which summarises the system.

Corporation tax returns must be submitted within twelve months of the year end and are required to be submitted electronically. In cases of delay or inaccuracies interest and penalties will be charged.

Capital Gains

Companies are chargeable to corporation tax on their capital gains less allowable capital losses.

Indexation allowance

In order to counteract the effects of inflation inherent in the calculation of a capital gain, an indexation allowance is given. However the allowance is not allowed to increase or create a capital loss.

It was announced in the Autumn Budget 2017 that the calculation of indexation allowance will be restricted for disposals of assets on or after 1 January 2018. The indexation allowance will be calculated using the Retail Price Index factor for December 2017 irrespective of the date of disposal of the asset.

Planning of disposals

Consideration should be given to the timing of any chargeable disposals to ensure advantage is taken where possible of minimising the tax liability at small profits rate rather than full rate. This could be achieved (depending on circumstances) by accelerating or delaying sales. The availability of losses or the feasibility of rollover relief (see below) should also be considered.

Purchase of new assets

It may be possible to avoid a capital gain being charged to tax if the sale proceeds are reinvested in a replacement asset.

The replacement asset must be acquired in the four year period beginning one year before the disposal and only certain trading tangible assets qualify for relief.

How we can help

Tax savings can only be achieved if an appropriate course of action is planned in advance. It is therefore vital that professional advice is sought at an early stage. We would welcome the chance to tailor a plan to your specific circumstances. Please do not hesitate to contact us.

Trusted advice, imapinative solutions.

It's the old adage that all accountants are the same, but ask yourself this; what kind of service would most add value to your personal or business position? In our opinion, the quality of advice and service is what separates a good accountant from a great one. This is where Rouse Partners can make a difference for you.

Our award-winning team make it their business to get to know you and your specific needs. Whether your goal is to grow your business, increase your personal wealth or improve your work-life balance, by understanding your challenges, we will address them together.

We also know how important it is for you to have a team that you can rely on for timely advice and reassurance. At Rouse, our people are our most important asset and we will select team members who offer an optimum mix of experience, specialism and knowhow. From your Partner, to your Tax Advisor, each team member will be accessible to you or your team and be proactive in seeking solutions.

At the heart of our way of working is a determination to think differently, to challenge the 'status quo' and to ask 'what if?'. Whether you are facing a complex tax, accounting or management situation, we are ready to find a solution.

Contact us today to discuss how we can support your personal or business tax needs:
